

PERENNIALS

Achillea 'Cerise Queen'

Height & Spread 60-75cm x 45cm

Packed heads of glowing cerise flowers displayed above green, ferny leaves in summer. Well drained soil in full sun.

Achillea 'Moonwalker'

Height & Spread 80-100cm

Bright yellow blooms on sturdy stems during summer. Bred for cut flowers production. Well drained soil in full sun.

Achillea 'Ptarmica Pearl'

Height & Spread 60-75cm

Clusters of white, button-shaped flowers produced during midsummer. Fern like foliage. Well drained soil in full sun.

Agastache aurantiaca 'Apricot Sprite'

Height & Spread 45cm x 30cm

Spikes of apricot flowers above highly aromatic foliage in summer. Sheltered site in well drained soil in full sun.

Anemone sylvestris

Height & Spread 30cm x 30cm

Fragrant white flowers with yellow centres above mid-green foliage during spring & early summer. Spreads in light soil to give good ground cover. Sun or partial shade in moist soil.

Anthemis 'Sancti Johannis'

Height & Spread 60cm x 45cm

Bright orange daisy like flowers over grey-green lobed foliage during summer. Any soil

Anthemis tinctoria 'Kelwayii'

Height & Spread 60-90cm x 45cm

Daisy like golden yellow flowers above attractively divided fern like foliage in summer. Any soil.

Aquilegia 'Alpina'

Height 15cm

Blue flowers borne in spring & early summer. Good for the rock garden. Any soil.

Aquilegia 'McKana Giant Hybrids'

Height 60-90cm

Long spurred flowers produced in a wide range of colours during early summer. Moist, well drained soil in sun or partial shade.

Aquilegia skinneri

Height 80cm

Spurs of orange-red and yellow centre during late spring and early summer. Moist, well drained soil in sun or partial shade.

Aquilegia vulgaris 'William Guinness'

Height 60cm

Almost black coloured blooms are produced in summer above attractive foliage. Well drained soil in sun or partial shade.

Aquilegia x hybrida 'Green Apples'

Height 60cm

Apple green coloured blooms produced during spring and early summer. Prefers moist soil in sun or partial shade.

Armeria maritima alba

Height 15-20cm

Forms tufts of narrow evergreen foliage and rounded white flower heads throughout summer. Well drained soil in full sun.

Armeria maritima splendens

Height 15-20cm

Common, pink flowering form. Requires well drained soil in full sun

Aruncus dioicus 'Goatsbeard'

Height 90-180cm

Bears small white-cream flowers in narrow, elongated clusters that branch off a tall flower stalk during early summer. Moist, well drained soil in partial shade.

Asclepia (Hedgehogs)

Height & Spread 150cm x 60cm

White flowers are followed by spherical, hairy seed pods, that resemble hedgehogs, during summer. Great for flower arranging. Moist, well drained soil.

Aster 'Benary's Composition'

Height 140cm

Display daisy like flowers in various colours during early autumn. Need fertile, well drained soil in an open, sunny site.

Aster 'Blue Boy'

Height 70cm

Produces masses of bright blue flowers in early autumn. Well drained soil in sun or partial shade.

Aster 'Jenny'

Height 40cm

Produces masses of red-purple double daisy like blooms from late summer to mid autumn. Fertile, moist soil in sun or partial shade.

Aubretia 'Royal Blue'

Height & Spread 5cm x 60cm

Low growing perennial bearing masses of purple-blue flowers during spring. Well drained soil in full sun.

Aubretia 'Royal Red'

Height & Spread 5cm x 60cm

Low growing perennial bearing masses of pink-red flowers during spring. Well drained soil in full sun.

Bergenia cordifolia 'Red Beauty'

Height 60cm

Bearing red flowers over dark evergreen foliage during spring. Prefers moist soil in partial shade.

PERENNIALS

Bergenia cordifolia 'Winterglut'

Height 45cm

Clusters of red flowers over evergreen foliage during spring. Moist soil in partial shade.

Campanula carpatica 'Blue Clips'

Height 20-30cm

Displays a mass of pale blue bell shaped flowers in midsummer. Requires well drained soil in sun or partial shade.

Campanula glomerata superba

Height 75-90cm

Produce round heads of rich violet-purple on upright stems during summer. Well drained soil in sun or partial shade.

Campanula persicifolia 'Blue'

Height 90cm

Produces bell shaped heads of pale violet-purple flowers on upright stems during summer. Well drained soil in sun or partial shade.

Campanula persicifolia 'Telham Beauty'

Height 75-90cm

Large cup-shaped flowers of rich blue in summer. Well drained soil in sun or partial shade.

Campanula rotundifolia (Harebell)

Height & Spread 30cm x 30cm

In summer, erect, slender stems bear lax, branched bell-shaped dark blue flowers above round to oval shaped dark green leaves. Can be naturalised in short turf. Prefers well drained soil in sun or partial shade.

Canterbury Bells calycanthema (Cup & Saucer Mixed)

Height 90cm

Mixed colours. Large bell-shaped flowers from late spring to early summer. Well drained soil in sun or partial shade.

Carnation Hardy Border Mixed

Height 45-60cm

Mixed colours produced during midsummer above grey-green foliage. Excellent cut flower. Fertile, well drained soil, containing lime, in full sun.

Catanache 'Cupid's dart'

Height & Spread 45-60cm x 45cm

White daisy like flowers above narrow, grey-green foliage in summer. Well drained soil in full sun.

Centranthus ruber 'Pretty Betsy'

Height & Spread 90cm x 90cm

Produces clusters of fragrant deep red flowers during summer. Well drained soil in full sun.

Chrysanthemum maximum 'White Knight'

Height 40cm

A semi-dwarf hybrid that produces, single, 10cm white blooms during summer. Well drained soil in sun or partial shade.

Cirsium 'Pink Beauty'

Height & Spread 100-200cm x 60cm

Produces pink thistle like flower heads above thistle like foliage during late summer and early autumn. Well drained soil in full sun.

Coreopsis - 'Sunray'

Height & Spread 60cm x 45cm

Produces masses of double yellow blooms during summer. Well drained soil in full sun.

Coreopsis 'Early Sunrise'

Height 40cm

Semi-double flowers of golden yellow are produced from late summer to early autumn. Compact and bushy variety. Well drained soil in full sun.

Coreopsis 'Rising Sun'

Height 50cm

Semi-double yellow flower with a red fleck to the centre of each petal during early summer. Prefers well drained soil in full sun.

Delphinium 'Astolat'

Height & Spread 120-150cm x 60cm

Spires of pink blooms above light green foliage during summer. Moist, fertile soil in sun. Shelter from high winds.

Delphinium 'Black Knight'

Height & Spread 120-150cm x 60cm

Spires of dark blue blooms are produced during summer. Moist, fertile soil in sun. Protect from high winds.

Delphinium 'Pacific Giants - Galahad'

Height & Spread 120-150cm x 60cm

Spires of semi-double white blooms in summer. Moist, fertile soil in sun. Protect from high winds.

Delphinium 'Round Table Mixed'

Height & Spread 120-150cm x 60cm

Produce large double flowers in a variety of shades during summer. Moist, fertile soil in full sun.

Dianthus deltoides 'Arctic Fire'

Height & Spread 10-15cm x 30cm

Trailing green foliage with carpet of white flowers with red 'eyes' in summer. Well drained soil in full sun.

Dierama pulcherrimum (Angel's Fishing Rod)

Height 150cm

Grey green foliage and bell shaped cerise pink flowers on arching stems during summer. Well drained soil in a sheltered, sunny position.

PERENNIALS

Digitalis 'Alba'

Height 90-150cm

Tall spikes of tubular white flowers are produced in summer. Biennial. Moist soil in full sun or partial shade.

Digitalis purpurea 'Sutton's Apricot'

Height & Spread 120cm x 60cm

Tall spires of apricot flowers in early summer. Moist soil in partial shade.

Digitalis 'Chocolate'

Height 60cm

Unusual, dwarf variety with red-brown flowers during summer. Prefers well drained soil in partial shade.

Digitalis 'Else Kelsey'

Height & Spread 120cm x 60cm

Produces white flowers with a red lip during summer. Prefers well drained soil in partial shade.

Digitalis 'Excelsior Hybrids'

Height & Spread 120cm x 60cm

Bear flowers in a range of pastel shades during summer. Well drained soil in partial shade.

Digitalis 'Foxy'

Height 75cm

Compact variety producing erect spikes of spotted flowers in summer. Mixed colours. Moist soil in sun or partial shade.

Doronicum orientale 'Little Leo'

Height & Spread 30-35cm

Semi-double, bright yellow blooms in early spring. Moist soil in partial shade.

Echinops ritro

Height & Spread 90cm x 45cm

Produces steel blue, rounded flower heads during mid-late summer above thistle like grey-green foliage. Well drained soil in sun or partial shade.

Echium pinninana 'Snow Tower'

Height 400cm

Produces funnel shaped clusters of tiny white flowers over large lance shaped, hairy leaves during mid-late summer. Well drained soil in full sun.

Erigeron 'Azure Fairy'

Height 45cm x 45cm

Produces daisy like flowers of pale laveneder blue during summer. Prefers moist, well drained soil in full sun.

Eryngium agavafolium

Height 100-150cm

Evergreen perennial with glossy, swordlike, spiky leaves and greenish white flowers during summer. Well drained soil in sun or partial shade.

Eryngium planum (Sea Holly)

Height 70cm

Oval, leathery dark green leaves with round blue blossoms with spiny bracts during summer. Well drained soil in full sun or partial shade

Euphorbia amagyloides purpurea

Height 70cm

Dramatic purple foliage throughout summer and autumn. Lime green bracts in early spring. Grows well in sun or partial shade.

Euphorbia characias subsp. Wulferii

Height & Spread 120cm x 120cm

Evergreen, shrubby perennial with blue-green foliage and crowns of yellow-green blooms in late spring and summer.

Festuca glauca

Height 25cm

Highly ornamental blue-grey grass provides colour all year round. Prefers well drained soil in full sun.

Gaillardia 'Goblin'

Height & Spread 25cm x 30cm

Dwarf variety bearing large, bright blooms of red tipped with yellow in summer and autumn. Well drained soil in full sun.

Gaillardia 'Sundance Bicolour'

Height 35cm

Masses of double flowers of red edged with yellow are produced on compact plants during summer. Well drained soil in full sun.

Geranium pratense 'Splish Splash'

Height 50-80cm

Large white blooms, striped with brilliant blue and irregularly speckled. Flowers during summer and prefers well drained soil in full sun.

Geum coccineum 'Cooky'

Height & Spread 45cm x 45cm

Compact variety bearing vivid orange flowers in early summer. Requires rich soil in sun or partial shade.

Geum 'Lady Strathden'

Height & Spread 45-60cm x 45cm

Bears double flowers of rich yellow during summer. Full sun or partial shade.

Geum 'Mrs Bradshaw'

Height & Spread 60cm x 45cm

Bears double flowers of scarlet during summer. Full sun or partial shade.

Helenium 'Helena Mix'

Height & Spread 120cm x 120cm

Daisy flowers in shades of yellow, red and orange during early summer. Well drained soil in sun or partial shade.

PERENNIALS

Helianthemum Mutabile Mixed

Height 25cm

Attractive rockery plant in a variety of shades including yellow, pink, red and orange during summer. Prefers well drained soil in full sun.

Heliopsis 'Scabra Summer Sun'

Height 120cm

Double bright golden yellow flowers on long stems from mid summer to autumn. Well drained soil in full sun.

Heuchera 'Bressingham Hybrids'

Height 75cm

Bears slender heads of attractive flowers during summer. Well drained soil in sun or partial shade.

Heuchera 'Firefly'

Height 75cm

Clump forming perennial producing slender spikes of scented, scarlet flowers over dark green marbled foliage in early summer. Full sun or partial shade.

Heuchera 'Palace Purple'

Height 45cm

Rounded purple leaves and sprays of tiny, white flowers from early summer. Sun or partial shade in well drained soil.

Hollyhock 'Chater's Double' Mixed

Height 180cm

Bear masses of bright coloured, double flowers throughout summer. Well drained soil in full sun.

Hollyhock 'Happy Lights' Mixed

Height 150cm

Very vigorous, single flowering variety with a wide colour range from white to purple and red to yellow. Flowers during summer and prefers well drained soil in full sun.

Hollyhock 'Summer Carnival Mixed'

Height 150cm

Double flowered perennial variety with a colour range from deep crimson, through pink and yellow to white. Flowers during summer and prefers well drained soil in full sun.

Hosta 'Fire & Ice'

Height 45cm

Variegated form of this perennial producing slender stems of pink flowers during summer. Prefers moist soil in partial shade.

Hosta 'Francee'

Height 45cm

Long olive green leaves with white margins and lavender blue flowers during summer. Moist soil in partial shade.

Hosta 'Great Expectations'

Height 55cm

Large blue-green leaves splashed with yellow and bell shaped greyish white flowers during early summer. Moist soil in partial shade

Hosta 'Patriot'

Height & Spread 55cm x 100cm

Olive green leaves, margined white and with grey-green splashes. Lavender blue flowers produced during summer. Moist soil in partial shade.

Hosta 'Sum & Substance'

Height & Spread 75cm x 120cm

Glossy yellow-green to yellow leaves with bell shaped pale lilac flowers during mid to late summer. Moist soil in partial shade.

Hosta 'Twilight'

Height 55cm

Olive-green leaves with yellow margins. Moist soil in partial shade

Hosta 'Wide Brim'

Height & Spread 45cm x 100cm

Dark green leaves with cream/white margins and funnel shaped pale lavender blue flowers during summer. Moist soil in partial shade

Jasione perennis 'Blue Light'

Height 45cm

Small scabious-like mid blue flower balls on 30cm stems during summer. Well drained soil in full sun.

Knautia avensis

Height & Spread 150cm x 30cm

Dull green leaves with flat topped bluish-lilac flower heads from mid summer to early autumn. Well drained soil in full sun.

Kniphofia

Height 75-120cm

Long narrow leaves and tall pokers of tightly packed scarlet buds opening to yellow flowers in summer. Well drained soil in full sun.

Lathyrus latifolius (Mixed)

Height 150-300cm

Bears sweet pea-like flowers in a range of colours during summer. Prefers full sun on fertile, well drained soil.

Lavender 'Hidcote'

Height 60cm

Small, evergreen shrub with aromatic foliage and dense spikes of scented, purple-blue flowers during summer. Requires well drained soil in full sun.

PERENNIALS

Lavender 'Kew Red'

Height 35cm

Aromatic foliage and flowers with large petals forming butterfly wings above rounded, red flower heads throughout summer. Full sun in well drained soil.

Lavender multifida 'Blue Wonder'

Height 60cm

Long lasting deep violet blue flowers throughout summer. Well drained soil in full sun.

Leontopodium alpinum (Edelweiss)

Height & Spread 20cm x 10cm

Clump forming perennial bearing grey-green foliage and small white star shaped flowers during spring or early summer. Well drained soil in sun or partial shade.

Liatris spicata 'Goblin'

Height & Spread 50cm x 30cm

Produces spikes of purple flowers on stiff stems in late summer above grass-like foliage. Well drained soil in full sun.

Linum perenne 'Blue Saphyr'

Height 30-45cm

Sky-blue flowers produced throughout summer above blue-grey foliage. Well drained soil in full sun.

Lobelia cardinalis 'Queen Victoria'

Height & Spread 75-90cm x 25cm

Tall upright stems bearing brilliant scarlet flowers during late summer. Moist soil in partial shade.

Lobelia kalmii 'Blue Shadow'

Height & Spread 25cm x 25cm

Vivid blue flowers on slender, upright stems during late spring and summer. Moist soil in sun or partial shade.

Lupinus arboreus

Height & Spread 60-120cm

A shrubby, semi-evergreen plant bearing short spikes of fragrant flowers during early summer. Good for coastal areas. Performs well on well drained soil in full sun

Lupin Gallery 'Blue'

Height & Spread 60cm x 45cm

A dwarf variety bearing blue-purple flower spikes during summer. Plant in well drained soil in sun or partial shade.

Lupin Gallery 'Pink'

Height & Spread 60cm x 45cm

Produces spikes of bright pink during summer. Plant in well drained soil in sun or partial shade.

Lupin Gallery 'Red'

Height & Spread 60cm x 45cm

Produces bright red spikes during summer. Well drained soil in sun or partial shade.

Lupin Gallery 'White'

Height & Spread 60cm x 45cm

Produces upright spikes of pure white during summer. Well drained soil in sun or partial shade.

Lupin Gallery 'Yellow'

Height & Spread 60cm x 45cm

A compact variety bearing bright yellow spires during summer. Well drained soil in sun or partial shade.

Lupin Lulu

Height 60cm

Dwarf variety covering the full colour range including bicolours. Well drained soil in full sun.

Lupin Russell 'Chandelier'

Height & Spread 120cm x 60cm

Displays spires of soft yellow flowers during early summer. Prefers well drained soil in sun or partial shade

Lupin Russell 'My Castle'

Height & Spread 90cm x 45cm

Produces brick-red spires during early summer. Well drained soil in sun or partial shade.

Lupin Russell 'Noble Maiden'

Height & Spread 105cm x 60cm

Produces spikes of ivory white during early summer. Prefers a well drained soil in sun or partial shade.

Lupin Russell 'The Chatelaine'

Height & Spread 90-120cm x 60cm

This variety produces spires of pink and white flowers during early summer. Prefers well drained soil in sun or partial shade.

Lupin Russell 'The Pages'

Height & Spread 90-120cm x 60cm

Spikes of bright carmine flowers in early summer. Well drained soil in sun or partial shade.

Lythrum 'Rosy Gem'

Height 100cm

Bushy plants producing rosy pink flower spikes during summer. Prefers well drained soil in full sun.

Monarda - Panorama Red Shades

Height & Spread 80cm x 45cm

This variety of Bergamot provides a long lasting display of fragrant red flowers during summer. Aromatic foliage and attractive to butterflies and bees. Best in moist, well drained soil in full sun.

PERENNIALS

Nepeta mussinii

Height & Spread 45cm

An aromatic plant producing numerous spikes of blue flowers above attractive grey-green foliage, during summer. Requires well drained soil in sun.

Nepeta 'Six Hill's Giant'

Height 80cm

Feathery foliage and soft blue flowers during summer. Attractive to butterflies and bees. Well drained soil in full sun.

Papaver orientale 'Allegro'

Height 40cm

Compact habit with 8-10 huge, scarlet flowers blooming simultaneously during summer. The strong stems resist wind and rain. Prefers well drained soil in full sun.

Phlox 'Laura'

Height 70cm

Upright variety bearing lilac flowers with pure white centres during late summer. Well drained soil in full sun.

Polemonium 'Blue Pearl' (Jacob's Ladder)

Height 70cm

Produces masses of azure blue flowers over fine, light green foliage during summer. Prefers well drained soil in sun or partial shade.

Potentilla nepalensis 'Miss Willmott'

Height 60cm

Produces sprays of bright carmine flowers during summer. Well drained soil in full sun.

Potentilla thurberi 'Monarch's Velvet'

Height 60cm

Clump forming plant with strawberry like leaves and rich raspberry red flowers with deep velvet centres. Flowers during summer. Well drained soil in full sun.

Primula denticulata - Hybrids Mixed

Height 30cm

Spring flowering variety bearing dense, round heads in a range of shades on strong upright stems. Moist soil in sun or partial shade.

Primula noverna 'Deep Blue'

Height 20cm

Bears attractive deep blue whorls of flowers during summer. Prefers moist, well drained soil in partial shade.

Primula vialli 'Orchid Primrose'

Height 30cm

Narrow spikes of tightly packed scarlet buds opening into purple flowers during summer. Moist soil in sun or partial shade.

Primula vulgaris

Height & Spread 20cm x 35cm

Produces clusters of pale yellow flowers during spring. Prefers moist, well drained soil in partial shade.

Pyrethrum Large Single Mixed (Tanacetum)

Height 75-90cm

Tall stems bearing colourful single/semi-double daisy like flowers above feathery foliage during early summer. Prefers light, well drained soil in full sun.

Pyrethrum 'Robinson's Single Giant Hybrids' Mixed (Tanacetum)

Height 75cm

Tall stems bearing single, large flowers in a variety of bright colours during summer. Prefers well drained soil in full sun.

Rehmannia angulata (Chinese Foxglove)

Height & Spread 150cm x 50cm

Branched stems produce bright pink foxglove shaped flowers above oval, hairy green leaves during summer and autumn. Prefer moist, well drained soil in sun or partial shade.

Rudbeckia fulgida 'Goldsturm'

Height & Spread 60cm x 45cm

Leafy variety, producing large, yellow, daisy like flowers with black centres during late summer and early autumn. Prefers well drained soil in full sun.

Rudbeckia purpurea 'Purple' Echinacea

Height 100cm

Purple-crimson daisy-like flowers up to 10cm across with cone shaped orange centre during summer. Prefers well drained soil in full sun.

Salvia 'East Friesland'

Height 45cm

Produces dense spikes of vivid blue flowers with purple-blue bracts during summer and autumn. Well drained soil in full sun or partial shade.

Salvia superba 'Blue Queen'

Height 30cm

Compact form producing dark violet spikes during summer. Well drained soil in full sun.

Salvia superba 'Rose Queen'

Height 75cm

Aromatic foliage bearing rose-pink spires during summer. Well drained soil in full sun.

Saxifraga arendsii 'Mossy Species' Mixed

Height 20cm

Tiny evergreen tufts of leaves bearing masses of pink, rose, red or white flowers during summer. Excellent rockery plant, preferring well drained soil in full sun.

PERENNIALS

Scabiosa caucasica 'Isaac House Hybrids' **Mixed**

Height & Spread 45cm x 60cm

The 'pincushion' flowers of this variety are ideal for cutting. Produced in a variety of shades during summer. Prefers well drained soil in full sun.

Sedum 'Autumn Joy'

Height 60cm

A clump forming, deciduous perennial bearing large, flat clusters of tiny, star shaped flowers during early autumn. These flowers darken from deep pink to copper-red as they mature. Well drained soil in full sun.

Sempervivum Species Mixed (House Leek)

Height 10cm

Evergreen succulent in a variety of colours. Excellent for old walls and rockeries. Requires well drained soil in full sun or partial shade.

Sidalcea 'Partygirl'

Height 90cm

This variety produces rose-pink saucer shaped flowers on upright stems, during summer. Moist soil in full sun.

Silene maritima 'Robin White Breast'

Height 20cm

Compact grey-green foliage bearing large white, carnation-like flowers in profusion during summer. Excellent plant for rockeries, preferring well drained soil in full sun.

Sisyrinchium striatum

Height 50cm

Long iris-like foliage with creamy-yellow blooms in early summer. Prefers well drained soil in sun or partial shade.

Solidago 'Golden Baby'

Height 70cm

This compact variety produces plumes of bright yellow flowers during summer. Any soil in full sun or partial shade

Teasel (Dipsacus fullonum)

Height & Spread 150-200cm x 30-80cm

Tooth shaped, spiny leaves bearing thistle-like pinkish purple or white flower heads during summer. Stiff, curved, prickly bracts are borne in mid to late summer. Excellent dried flower.

Trollius 'Golden Queen'

Height & Spread 60cm x 45cm

Fresh mid-green leaves with shallow ball shaped orange-yellow flowers during summer. Prefers moist, well drained soil in sun or partial shade.

Verbascum 'Arctic Summer'

Height & Spread 90-120cm x 45cm

Produces woolly, white leaves and stems crowned by upright spikes of bright yellow flowers during summer. Well drained soil in full sun.

Verbascum 'Banana Custard'

Height 150-180cm

Strong, erect spikes, packed with large 5cm flowers of two-tone yellow above large green, hairy leaves. Prefers well drained soil in moderate sun.

Verbascum phoeniceum Hybrids

Height & Spread 70cm x 45cm

This variety produces slender spires of small flowers in a variety of dark and pastel colours. Prefers poor, well drained soil in full sun.

Verbascum 'Southern Charm'

Height 60-70cm

A unique blend of creamy yellow, soft lavender and peachy rose shades each marked with a fuzzy purple bee. Prefers well drained soil in moderate sun.

Verbena bonariensis

Height & Spread 120-150cm x 60cm

Produces tall, upright stems bearing rose-lavender heads during summer and early autumn. Requires well drained soil in full sun.

Veronica 'Shirley Blue'

Height 15-25cm

This variety forms a loose mound of pale green leaves and upright spikes of deep blue flowers during summer. Well drained soil in sun or partial shade.

Veronica 'Sightseeing'

Height 70cm

A mixture of pink, white and blue flowers during summer. Make good cut flowers.

Viola sororia 'Freckles'

Height 20cm

A rare and unusual violet with white flowers speckled with pale purple. Flowers during spring and early summer. Prefers a moist, well drained soil in sun or partial shade.
