

SHRUBS

Abelia x grandiflora Francis Mason

Height & Spread 150cm x 150cm

Semi-evergreen shrub with golden-variegated leaves on arching stems and fragrant pink-tinted flowers during summer. Prefers sunny, sheltered site.

Aucuba japonica Crotonofolia

Height & Spread 150cm x 120cm

Evergreen shrub with large leaves of bright green with golden variegations. Male form. Most soil types insun or partial shade.

Berberis thunbergii Green Carpet

Height 60cm

Deciduous shrub. Spreading groundcover with leaves turning red in autumn. Red berries. Good for attracting garden birds. Requires well drained soil in sun or partial shade.

Buddleja davidii Black Knight

Height & Spread 180cm x 180cm

Deciduous shrub, bearing large panicles of deep, violet-purple flowers during summer and autumn. Butterfly attractant. Requires full sun.

Buddleja davidii White Profusion

Height & Spread 210cm x 210cm

Deciduous shrub bearing pure white, fragrant flowers during summer and autumn. Butterfly attractant. Requires full sun and fertile soil.

Buddleja davidii Nanho Blue

Height & Spread 120cm x 120cm

Compact variety, bearing spikes of blue flowers during late summer. Attractive to butterflies. Requires fertile soil in full sun.

Buddleja davidii Pink Delight

Height & Spread 240cm x 180cm

Deciduous shrub bearing long fragrant spikes of bright pink flowers during summer and autumn. Butterfly attractant. Requires full sun and fertile soil.

Buddleja davidii Royal Red

Height & Spread 180cm x 180cm

Deciduous shrub bearing large panicles of purple-red flowers during summer and autumn. Fragrant blooms are attractive to butterflies. Requires full sun.

Buddleja x weyeriana Sungold

Height & Spread 240cm x 240cm

Hybrid variety bearing ball-shaped clusters of deep orange flowers during summer. Attractive to butterflies. Requires fertile soil in full sun.

Callicarpa bodineri var. giraldii Profusion

Height & Spread 120cm x 120cm

Deciduous shrub, grown for its dense clusters of colourful berries in autumn. Fertile soil on a sunny, sheltered site.

Caryopteris x clandonensis Autumn Pink

Height & Spread 75cm x 75cm

Deciduous shrub with green aromatic foliage, bearing light pink flowers in late summer and early autumn. Requires well drained soil in full sun.

Caryopteris x clandonensis Heavenly Blue

Height & Spread 75cm x 75cm

Compact, deciduous shrub with grey-green, aromatic foliage, bearing deep blue flowers in late summer. Requires well drained soil in full sun.

Caryopteris x clandonensis Kew Blue

Height & Spread 75cm x 75cm

Compact, deciduous shrub with grey-green, aromatic foliage bearing dark blue flowers in late summer. Requires well drained soil in full sun on a sheltered site.

Caryopteris x clandonensis Worcester Gold

Height & Spread 90cm x 90cm

Deciduous shrub, with pale green to golden yellow foliage, bearing mid-blue flowers during late summer. Requires well drained soil in sun or partial shade.

Ceanothus Burkwoodii

Height & Spread 120cm x 120cm

Evergreen shrub with dark, glossy leaves, bearing clusters of rich blue flowers during summer and autumn. Requires south or west-facing wall in well drained soil.

Ceanothus Concha

Height & Spread 300cm x 300cm

Evergreen shrub. In late summer reddish buds open to produce dark blue flowers. Prefers well drained soil in full sun.

Ceanothus Puget Blue

Height & Spread 150cm x 150cm

Evergreen shrub bearing masses of deep blue flowers during spring and early summer. Requires south or west-facing wall in any well drained soil, except chalk.

Ceanothus thrysiflorus repens

Height & Spread 90cm x 150cm

Mound-forming, evergreen shrub, bearing clusters of Cambridge blue flowers during early summer. Needs full sun in almost any well drained soil, except chalk.

Ceanothus Pershore Zanzibar

Height & Spread 250cm x 200cm

Evergreen shrub with variegated, gold-green foliage. Produces bright blue cluster of flowers from early summer onwards. Requires well drained soil in full sun.

SHRUBS

Choisya ternata Sundance

Height & Spread 90cm x 90cm

Evergreen shrub, grown mainly for its golden foliage. Bears small fragrant, white flowers in late spring. Requires well drained soil on a sheltered, sunny site to maintain its foliage colour.

Cistus Alan Fradd

Height & Spread 100cm x 100cm

Deciduous shrub with white flowers with chocolate blotch. Requires well drained soil in full sun. Good for coastal areas.

Cistus x laxus Snow White

Height & Spread 90cm x 90cm

Evergreen shrub producing white, saucer shaped flowers with yellow centres during summer. Requires well drained soil in a sunny, sheltered site. Excellent for coastal areas and grows well on chalky soil.

Cornus alba Gouchaltii

Height and Spread 150cm x 150cm

Deciduous shrub with pink flushed, yellow margined leaves. Bare red stems during winter. Prefers a moist soil in sun.

Cornus alba Kesselringii

Height & Spread 150cm x 150cm

Deciduous shrub with dark brownish-purple stems in winter and red and purple autumn leaves. Requires moist soil in sun or partial shade.

Cornus alba Spatheii

Height & Spread 180cm x 180cm

Deciduous shrub with bare, red-barked stems during winter and green and gold variegated leaves from spring to autumn. Prefers a moist soil in sun to maintain its foliage colour.

Cornus sanguinea Midwinter Fire

Height & Spread 90cm x 90cm

Compact, deciduous shrub with brilliant orange, yellow and red stems during winter. Attractive foliage and white flowers during spring and summer. Requires moist soil in sun or partial shade.

Cotoneaster dammeri

Height & Spread 10cm x 90cm

Prostrate, evergreen shrub bearing white flowers in early summer followed by bright red berries in autumn. Excellent groundcover plant. Requires any soil type in sun or partial shade.

Cotoneaster horizontalis

Height & Spread 30cm x 120cm

Deciduous shrub bearing 'herring bone' style stems, clothed in dark green foliage that turns red in late autumn. Produces bright red berries from late summer onwards. Excellent groundcover shrub that can also be wall-trained. Requires full sun or partial shade.

Cotoneaster microphyllus

Height & Spread 60cm x 120cm

Dwarf, evergreen shrub bearing small, white flowers in early summer and large, scarlet berries in autumn. Good groundcover. Requires sun or shade.

Cytisus Andreanus

Height & Spread 120cm x 120cm

Deciduous shrub with yellow and rich crimson flowers. Prefers well drained soil in full sun.

Escallonia Apple Blossom

Height & Spread 250cm x 250cm

Compact, evergreen shrub with glossy, dark green leaves. Bears short racemes of apple blossom pink flowers during summer. Requires well drained soil in full sun.

Escallonia Donard Seedling

Height & Spread 240cm x 210cm

Arching, evergreen shrub bearing abundant clusters of soft, pink buds, opening to white flowers, during summer. Good for coastal gardens and makes an attractive hedge. Well drained soil in full sun.

Escallonia C.F. Ball

Height and Spread 240cm x 150cm

Evergreen shrub with rich, crimson flowers over dark green foliage, throughout summer and autumn. Requires well drained soil in full sun. Tolerates chalky soil types.

Escallonia Red Dream

Height 120cm

Evergreen shrub bearing deep-red rosettes of flowers and very glossy, deep green leaves. Flowers throughout summer but requires well drained soil in full sun to perform well.

Escallonia Red Elf

Height & Spread 90cm x 90cm

Compact, evergreen shrub with dark glossy foliage and deep crimson flowers during summer. Requires full sun on a sheltered site. Will grow on chalky soil types.

Hypericum calycinum

Height 60cm

Dwarf, semi-evergreen shrub with dark green foliage bearing saucer shaped bright yellow flowers in summer. Excellent groundcover in shaded areas. Requires well drained soil.

Hypericum Hidcote

Height & Spread 90cm x 90cm

Compact, semi-evergreen shrub with deep green foliage and a profusion of large golden-yellow flowers during summer and autumn. Requires well drained soil in sun or partial shade.

SHRUBS

Hypericum x moserianum Tricolour

Height & Spread 45cm x 45cm

Evergreen shrub bearing green and white leaves with pink margins. Produces an abundance of yellow flowers in summer and autumn. Requires a sheltered site and well drained soil.

Ilex aquifolium Silver Van Tol

Height 250cm

Upright leaves with creamy white margins, almost spineless. Free berrying. Requires sun or shade in moist soil.

Ilex aquifolium J.C. Van Tol

Height & Spread 600cm x 360cm

Self-pollinating variety with almost spine-free leaves of dark, glossy green. Masses of red berries produced from autumn onwards. Requires sun or shade in moist, but not waterlogged soil.

Ilex x meserveae Blue Angel

Height & Spread 150cm x 120cm

Dark green leaves, turning purple in winter. Female produces bright red berries. Requires moist soil in partial shade.

Kerria japonica Pleniflora

Height & Spread 180cm x 180cm

Deciduous shrub producing an abundance of double orange-yellow flowers on tall, upright stems in late spring. Requires sun or partial shade.

Kolwitzia amabilis Pink Cloud

Height & Spread 150cm x 150cm

Deciduous shrub with graceful, arching stems, bearing abundant clusters of pink flowers in early summer. Prefers well drained soil in full sun.

Lavatera Blushing Bride

Height & Spread 180cm x 180cm

Shrubby mallow producing an abundance of soft, pink, silky flowers, blushed with deep pink throughout summer and autumn. Requires full sun.

Lavatera x clementii Bredon Springs

Height & Spread 120cm x 120cm

Compact, deciduous variety forming a dense mound of soft, downy foliage and large, mauve, flushed dusky pink flowers during summer and autumn. Requires full sun.

Lavatera x clementii Burgundy Wine

Height & Spread 90cm x 90cm

Deciduous variety of shrubby mallow, forming a bush of soft, velvety green foliage and masses of large, deep burgundy flowers during summer and autumn. Requires full sun.

Lavatera x clementii Rosea

Height & Spread 180cm x 180cm

Deciduous, fast-growing, shrub producing an abundance of rose-pink flowers, above soft, downy foliage throughout summer and autumn. Requires full sun.

Leptospermum grandiflorum

Height & Spread 400cm x 200cm

An upright, evergreen shrub, with grey-green leaves. Saucer-shaped, white flowers are produced during mid to late summer. Requires well drained soil in full sun or partial shade.

Lonicera nitida Red Tips

Height & Spread 150cm x 200cm

Evergreen, bush honeysuckle with dense, glossy foliage that is deep green when mature and plum coloured when young. Tiny, fragrant flowers are produced in spring, followed by purple fruits. Excellent hedging plant. Prefers fertile, moist soil. Open site best to maintain colour.

Magnolia soulangiana Susan

Height & Spread 180cm x 120cm

Compact, free flowering bush with glossy mid-green foliage. Produces, fragrant, purple and white tulip-shaped flowers during late spring to early summer. Requires rich, moist, acid soil in sun or partial shade.

Magnolia stellata

Height & Spread 120cm x 120cm

Compact, deciduous shrub bearing white, star-shaped, fragrant flowers during spring. Requires moist soil in sun.

Magnolia stellata Rosea

Height & Spread 120cm x 120cm

Compact, deciduous shrub bearing star-shaped, blush-pink, fragrant flowers during spring. Requires moist soil in sun.

Osmanthus heterophyllus Purpureus

Height & Spread 300cm x 300cm

Evergreen shrub with holly-like leaves, smothered with tubular, white flowers during late summer and autumn followed by blue-black fruit. This variety has dark black-purple young leaves. Requires well drained fertile soil in sun or partial shade.

Pachysandra terminalis Green Carpet

Height & Spread 15cm x 60cm

Evergreen shrub forming a compact carpet of leathery leaves. Clusters of white flowers are produced in spring and early summer. Prefers moist soil in full sun.

SHRUBS

Passiflora caerulea (Passion Flower)

Height & Spread 300cm x 300cm

Semi-evergreen climber bearing exotic blue and white flowers against palm-shaped foliage. Small orange fruits may be present in autumn after a hot summer. Requires well drained soil on a south-facing wall in full sun.

Perovskia Blue Spire

Height & Spread 120cm x 90cm

Deciduous shrub bearing long, lavender blue flowers spikes during summer above grey-green, aromatic foliage. Requires well drained, alkaline soil in full sun. Good for coastal sites.

Philadelphus Virginal (Mock Orange)

Height & Spread 240cm x 180cm

Deciduous shrub, bearing double, white, highly fragrant flowers on strong stems during summer. Requires well drained soil in sun or partial shade.

Potentilla fruticosa Abbotswood

Height & Spread 75cm x 120cm

Deciduous shrub with white flowers and dark blue-green leaves. Good groundcover plant. Requires moist soil in sun or partial shade.

Potentilla fruticosa Daydawn

Height & Spread 75cm x 75cm

Dwarf, deciduous shrub producing peach-pink flowers throughout summer. Good groundcover plant. Requires moist soil in sun or partial shade.

Potentilla fruticosa Primrose Beauty

Height & Spread 90cm x 90cm

Small, deciduous shrub producing an abundance of pale, primrose yellow flowers on arching stems, throughout summer. Requires fertile soil in sun or partial shade.

Potentilla fruticosa Red Ace

Height & Spread 60cm x 90cm

Compact, dwarf, deciduous shrub. Produces masses of vermilion red flowers during summer and autumn. Requires well drained soil in partial shade as full sun causes the flower colour to fade.

Prostanthera cuneata

Height & Spread 30cm x 30cm

Evergreen shrub bearing tiny, aromatic leaves of dark green and white flowers during summer. Requires moist soil in full sun.

Prostanthera rotundifolia

Height & Spread 300cm x 200cm

Bushy, evergreen shrub, with long, deep green, aromatic leaves and purple to lilac purple bell-shaped flowers during summer. Requires well drained soil in full sun.

Prunus laurocerasus Rotundifolia

Height & Spread 450cm x 360cm

Bushy, evergreen shrub bears white flowers in spring followed by small, red fruits. Seed kernels harmful if eaten. Good hedging plant. Performs well in all but chalky soil types.

Prunus lusitanica (Portugese Laurel)

*Height & Spread - Shrub 180cm x 150cm
- Tree 21m x 21m*

Bushy evergreen shrub or tree bearing dark glossy leaves on reddish stems. Narrow spikes of white flowers are produced during summer, followed by red fruits. Requires well drained soil in sun or partial shade.

Rosmarinus officinalis Miss Jessopp's Upright

Height & Spread 200cm x 200cm

Evergreen shrub with aromatic leaves bearing light blue flowers during summer. Good hedging plant. Requires well drained soil in full sun.

Rosmarinus officinalis Prostratus

Height & Spread 8-15cm x 180cm

An evergreen, trailing form of Rosemary bearing narrow, fresh green foliage and light blue flowers from spring onwards. Requires well drained soil in full sun.

Sambucus nigra Black Beauty

Height & Spread 300cm x 300cm

Deciduous shrub grown for its intense purple foliage and clear pink flowers. Produces purple-black elderberries suitable for winemaking. Requires fertile soil in sun or partial shade. Tolerates chalky sites.

Sarcococca humilis

Height & Spread 60cm x 100cm

Dwarf, clump forming, evergreen shrub with glossy, dark green leaves. In winter, bears clusters of fragrant, pink-tinged, white flowers followed by dark blue-black fruit. Good for deep to partial shade.

Senecio greyii Sunshine

Height & Spread 60cm x 90cm

Low growing, evergreen shrub with silver-grey leaves and daisy-like yellow flowers in summer. Prefers well drained soil in full sun.

Spirea japonica Candlelight

Height & Spread 75cm x 75cm

Compact, deciduous shrub with pale yellow young foliage turning to rich yellow with pink flowers during midsummer. Prefers well drained soil in full sun.

SHRUBS

Spirea japonica Firelight

Height & Spread 75cm x 90cm

Deciduous shrub with richly coloured young foliage turning brilliant red in autumn. Flowers of rose-pink are produced during midsummer. Requires well drained soil in full sun.

Spirea japonica Goldflame

Height & Spread 60cm x 60cm

Dwarf, deciduous shrub producing brilliant flame and gold foliage in spring, turning to green during summer when flowers of deep rose-pink are displayed. Prefers well drained soil in full sun.

Spirea japonica Gold Mound

Height & Spread 25cm x 25cm

Dwarf, deciduous shrub bearing golden foliage with pink flower heads during midsummer. Prefers well drained soil in full sun.

Spirea nipponica Snowmound

Height & Spread 90cm x 90cm

Deciduous, mound forming, variety, producing an abundance of small, white flowers during early summer. Prefers full sun.

Viburnum x burkwoodii

Height & Spread 1880cm x 180cm

Evergreen shrub with dark, glossy leaves and an abundance of fragrant, white flowers during winter and spring. Prefers moist, fertile soil in sun. Shelter from cold winds.

Viburnum farreri (fragrans)

Height & Spread 180cm x 180cm

Deciduous variety bearing clusters of pink-tinged, fragrant, flowers during winter and early spring. Prefers well drained soil on a sunny site. Protect from cold winds.

Viburnum opulus Roseum (sterile)

Height & Spread 210cm x 180cm

Deciduous variety producing rounded heads of creamy-white flowers during early summer and colourful foliage in autumn. Requires moist soil in full sun.

Viburnum tinus

Height & Spread 180cm x 180cm

Evergreen shrub bearing dark, shiny leaves and clusters of white flowers during winter and early spring, followed by metallic blue-black fruits. Prefers moist soil in sun or shade.

Viburnum tinus Eve Price

Height & Spread 120cm x 120cm

Evergreen variety, forming a compact, dense bush. Produces a succession of bright pink buds opening into pink-tinged flowers during winter and spring. Prefers moist, fertile soil on a sunny site.

Viburnum tinus Purpureum

Height & Spread 240cm x 240cm

Grown for its decorative, evergreen foliage with purple and bronze tints. Produces clusters of small, white flowers during winter and spring.

Weigela Bristol Ruby

Height & Spread 120cm x 90cm

Deciduous, hybrid variety, bearing an abundance of ruby-red flowers during early summer. Prefers moist, well drained soil in sun or partial shade.

Weigela florida Foliis Purpureis

Height & Spread 75cm x 135cm

Compact, deciduous variety producing pink, tubular flowers during early summer and attractive purple foliage. Requires moist soil in sun or partial shade.

Weigela florida Variegata

Height & Spread 90cm x 90cm

Medium-sized, deciduous variety with pale pink flowers during early summer and green leaves with creamy white margins. Prefers well drained, fertile soil in sun or partial shade.

Weigela Red Prince

Height 200cm

Deciduous shrub with pale green leaves, bearing clusters of foxglove-shaped flowers in deep red from late spring through to late summer. Requires well drained soil in full sun.
